options

Connect to the cache GUI using your browser.

<https://xxx.xxx.xxx.xxx:8443>

From the Configuration menu.

Select Access Control.

Select Profiles and Policies.

Make a NEW Profile.

Give the profile a name - 'Bad_IP'.

Select 'IP addresses of cache clients' or 'Origin server IP address'.

Press Submit.

List your IP addresses - one per line - CIDR format is accepted.

Press Submit.

Make a NEW Cache Access Policy.

Touch the 'Bad_IP' profile.

Press the Move Right button.

Select the Deny bullet.

Press Submit.

Pull down the Cache Access Policy list.

Touch the 'Bad_IP' policy.

Press the 'Move Up' button.

Repeat this action until the policy is above any 'Allow All' or 'Deny All' statement.

Under Administration.

Select Restart the Cache, which only takes 3 to 5 seconds.
